

Long-lasting effect
Single injection up to 6 months

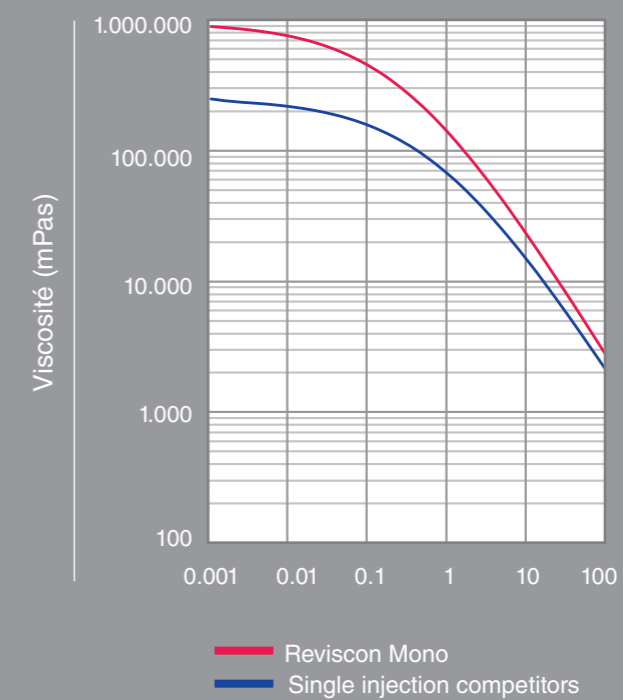

Structured NaHa Pattern

Reviscon Mono contains one of the highest molecular weights of sodium hyaluronate with unique cohesive energy characteristics.

Excellent rheological profile is designed for greater zero shear viscosity resulting in efficient pain relief and dynamic elasticity at higher shear rates for enduring mobility.

Excellent Rheological Pattern

Reviscon Mono 48mg

Excellent high viscosity for long-lasting efficiency by single injection

48 mg HA (2.0%) in 2.4 ml solution

1 injection

Bacterial fermentation

3.0 Mda Molecular Weight

900.000 mPa.s viscosity
